SUMMARY

A skilled programmer specializing in front-end development with React and modern tools like Vite. Combines technical expertise with leadership as an Enactus project manager, delivering sustainable and impactful solutions through innovation

EDUCATION

Faculty of Arts, Menoufia University
Major : History

October 2022 – June 2026

Training Experience

Web Development Trainee - Route

August 2024 – Present

ALX AI Career Essentials Graduate

October 2024 – December 2026

Leadership Training – The British University in Egypt

Enactus General orientation Training – The British University in Egypt

Projects

Enactus Website :

- Developed a full-featured, scalable website for Enactus, showcasing team members, events, and projects with a dynamic and organized structure.
- Frontend: Built with HTML, CSS, and JavaScript for responsive design and dynamic behavior. Utilized JavaScript to enhance interactivity, including JSON data handling for member achievements and API integration for contact forms.
- Backend: Static website with the possibility of future CMS integration for dynamic content.
- Additional implementations or tools used: Integrated Google Sheets API for contact form submissions, and all images are hosted for easy access.

E-Commerce Web Application :

- Developed a full-featured e-commerce web application with user authentication, product browsing, and a seamless shopping experience.
- **Frontend:** Built with React and Vite for optimized performance. Implemented API fetching to dynamically load products, authentication, and user interactions. Utilized React Router for navigation and state management for efficient data handling.
- **Backend:** Integrated with an external API for product data and user authentication. Implemented secure login and registration functionality with authentication handling.
- **Additional implementations or tools used:** Used local storage for cart persistence, implemented form validation for user inputs, and optimized performance with lazy loading where applicable.

Knouz Website for Handicrafts

- A visually engaging and responsive web platform promoting and selling Egyptian handicrafts.

Frontend:

- Developed using **React**, **Vite**, and **Tailwind CSS** for fast performance and modern UI.
- Utilized **React Router** for seamless navigation across product categories and video tutorials.
- Integrated **Framer Motion** for smooth animations enhancing user experience.
- Featured dynamic filtering, product cards, and a dark mode toggle.

Additional Implementations:

- Learning resources hosted as videos with structured categorization.
- Responsive across devices, ensuring accessibility for artisans and buyers alike.

- Focused on cultural preservation and economic empowerment for local artisans.
-

Knouz Mobile App (React Native)

- A bilingual mobile application (Arabic/English) targeting buyers and sellers of Egyptian handicrafts.

Key Features:

- **Buyer View:** Access to featured, most sold, and categorized products with a product details page and mock payment interface.
 - **Seller View:** Ability to browse marketplace listings and add new products via intuitive forms.
 - Local-first design supporting areas with limited internet connectivity.
 - Created with **React Native**, ensuring a smooth cross-platform experience for Android and iOS users.
 - Leveraged **React Navigation** and **State Management** (Context API or Redux) for fluid UX.
-

Arabic E-learning Platform

- An educational platform designed to deliver high-quality Arabic-language learning resources.

Frontend:

- Built using **React**, **Vite**, **Tailwind CSS**, and **TypeScript** for performance, scalability, and maintainability.
- Authentication flows built with **Formik**, **Yup**, and **JWT Decode** for secure login and registration.
- Pages include: Landing Page, All Courses Page, Course Details Page, and a dashboard for logged-in users.

Routing & Interactivity:

- Used **React Router DOM** for dynamic navigation.
- Course content rendered conditionally based on user roles.

Charts & Data Visualization:

- Integrated **Recharts** to visualize student progress, course analytics, and activity logs.

Weavolution Web Platform (React, TailwindCSS, Framer Motion)

- A sustainable textile recycling initiative showcasing upcycled products such as 3D printing filament, yarn, MDF boards, and furniture.
- Developed a responsive, user-friendly web platform to promote eco-friendly products and connect with local artisans and manufacturers.

- Implemented dynamic UI components and smooth animations using Framer Motion for enhanced user engagement.
- Built scalable frontend with React and styled with TailwindCSS to ensure fast load times and accessibility.
- Integrated backend APIs for product management, user interactions, and order processing, supporting the circular economy mission.

VOLUNTEER ACTIVITIES

Greenish Facilitator Team Head
September 2023 – September 2024

- Led and facilitated sustainability-focused workshops and initiatives to drive environmental awareness.

Enactus Project Management Team Member
September 2023 – September 2024

- Enactus project team member contributing to solving environmental challenges through innovative solutions.
- Developed strong teamwork skills, including collaboration and effective communication.
- Contributed to the **Banova** project, which focused on turning banana waste into sustainable products, including gluten-free flour , pigments and Hydrogels.
- Focused on researching and experimenting with methods to convert banana waste into eco-friendly products, while supporting documentation to ensure sustainability goals.

Enactus Project Management Team Head
September 2024 – Present

- Managing a team of 30 members, assigning tasks, overseeing the progress.
- Coordinating research efforts, guiding the development process, and monitoring the project’s progress to ensure successful outcomes.
- Mentor team members, providing guidance on technical aspects and project management to enhance individual skills and foster a collaborative environment.

Achievements

Team Leader at Enactus Boot Camp

Led and mentored a team in a competitive, high-impact entrepreneurial training program.

First Place Project at GIZ (Gesellschaft für Internationale Zusammenarbeit)

- Secured the top position in a GIZ-sponsored competition, showcasing innovation and sustainability.

First Place in Juhayna Sustainability Competition

- Won first place for a sustainability-driven project, demonstrating leadership and problem-solving skills.

SKILLS

Personal Skills : Team Collaboration – Problem Solving - Communication Skills -Time Management -Leadership

Back-End Development : NodeJS

Front-End Development : HTML5 -CSS3 -JS - React -Tailwind – BootStrap

Software Tools : Git - VS Code

Hobbies

- Gaming
 - Research
 - Motor Sports
 - Reading

LANGUAGES

- Arabic- Native
 - English- Conversational
